OSBON
ErecAid[®]
VACUUM THERAPY SYSTEM

As a man with diabetes at 50, your chances of having difficulties with an erection are over 50%. When you reach the age of 70, incidence rises to 95%.¹ Fortunately there is hope. The Osbon ErecAid System works for the vast majority of men with diabetes who try it.

CAUSES OF ERECTILE DYSFUNCTION IN MEN WITH DIABETES

Men with ED are more than twice as likely to have diabetes as men without ED.² Non-diabetics, even spouses and physicians, often don't fully understand how fluctuating blood sugar levels and just "not feeling right" complicate the problem of ED. The real reasons for diabetic-related ED, however, are closely related to neuropathy (nerve pain or "tingling") and other conditions often common to diabetics such as coronary artery disease and hypertension.³ Medications taken for these conditions often work against good erectile function.

YOUR ED CAN BE TREATED

You and your partner should be relieved to know that ED caused by complications of diabetes can be effectively treated. The Osbon ErecAid System works for over 90% of the men who try it. For those of you who have tried Viagra® or other oral medications, you may find that, over time, these medications become less effective. The Osbon ErecAid offers a consistency that you can depend on.

LIFESTYLE CONSIDERATIONS

You can also reduce the effects of ED by maintaining a regular exercise program and a carefully controlled diet.

Neuropathy and retinopathy are caused by poor blood sugar management. If you can keep your A1c level at or below 7.0, you will be doing yourself a huge favor, both for your diabetes and for ED.

COST EFFECTIVE TREATMENT

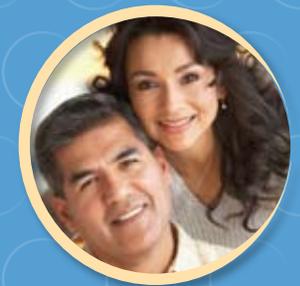

The cost of oral medications continues to climb every year. The Osbon ErecAid system is a relatively modest one-time cost with allowable coverage provided by MediCare and many private insurance plans. Deductibles and copays vary by state.

RELIABILITY

Studies have consistently shown that the Osbon ErecAid enjoys a better than 90% success rate for men, regardless of the reason for ED.³ With no surgery and no serious side effects, it is the vacuum treatment doctors prescribe most, with over 1 million satisfied users.

EASY TO USE

The ErecAid System uses vacuum therapy, a proven method that is easy to learn and easy to use. It includes training with an accredited technician, plus a step-by-step video guide and instruction booklet.
